Current Perspectives in Forensic Psychology and Criminal Behavior
Academic Internet Pub Incorporated
"Lively and engaging, Understanding Homicide impressively fills an important gap in the current criminological literature... an authoritative and readable text on homicide." Keith Soothill, Lancaster University, UK Why do

people kill? How is homicide investigated? What are the patterns and characteristics of UK homicide? How can it be prevented? Here is a comprehensive and challenging text unravelling the phenomenon of homicide. The author combines original analysis with a lucid overview of the key theories and debates in the study of homicide and violence. In introducing the broad spectrum of different features, aspects and forms of homicide, Brookman examines its patterns and

trends, how it may be explained, its investigation and how it may be prevented. Areas covered include: · the killing of children · multiple homicide (including serial and mass murder, terrorism and corporate homicide) · domestic homicide · female killers · homicide amongst men The book is unique in its focus, coverage and style and bridges a major gap in criminological literature. Whilst focused in several respects upon the UK experience of homicide, the text necessarily draws upon and makes a significant contribution to international literature, research and debate. The text has been written in a style that will be accessible to a wide audience and assumes no prior knowledge. Features to aide the student include study tasks,

review questions and annotated suggested further reading, including internet resources. Understanding Homicide is ideal for undergraduate and postgraduate students in the fields of criminology, criminal justice, psychology, sociology and forensics. It will also be invaluable to academics, researchers and practitioners interested in the phenomenon of homicide and the broader issue of violence.

The Nurture Versus Biosocial Debate in Criminology: On the Origins of Criminal Behavior and Criminality takes a contemporary approach to address the sociological and the biological positions of human behavior by allowing preeminent scholars in criminology to

speak to the effects of each on a range of topics. Kevin M. Beaver, J.C. Barnes, and Brian B. Boutwell aim to facilitate an open and honest debate between the more traditional criminologists who focus primarily on environmental factors and contemporary biosocial criminologists who examine the interplay between biology/genetics and environmental factors.

Psychological Criminology SAGE

Honor related violence is generally associated with crimes committed by people from the Middle East and adjacent areas. Perpetrators sometimes

justify their deeds saying they 'had to' restore their honor. Theorists have argued that men from these populations exclusively correlate honor with the behaviour of their womenfolk, which they use as a pretext to further oppress and dominate women. Due to large-scale migration, western societies have become acquainted with honor related violence and honor killings. In this book, Robert Ermers addresses a number of questions related to honor related violence, including the use of predominantly negative frames regarding the cultural and social background of non-westerners and immigrants. In many publications, including the press, crimes committed by non-western individuals are often attributed to their cultural background

rather than specific contexts or circumstances, in contrast to western cases. Vague and insufficiently defined concepts such as 'honor' and 'culture' strongly contribute to this bias. Honor Related Violence deals with honor and honor related violence, their background and contexts, what honor is, and what it is not. It examines stigma in relation to honor and based upon stigma research, reliably explains, analyses, and predicts honor related violence. The book argues that people all over the world can be stigmatized, excluded and ostracized when they commit misbehavior, and therefore find themselves in a state of dishonor which can lead to honor related violence. A timely intervention into the psychology of honor related violence, this is an essential resource for students

and researchers in the fields of social psychology, sociology, law, criminology and anthropology.

Criminal & Behavioral Profiling Routledge

This volume uses a cognitive-behavioral and interactionist approach, integrating international theory and research and moving from broad, theoretical explanations and descriptions of crime toward empirical research on specific criminal offenses. Viewing the criminal offender as being embedded and continually influenced by multiple systems within the psychosocial environment, the book examines the causes, classification, prediction, prevention intervention, and treatment of criminal behavior from a social psychological perspective. The Sixth Edition presents the criminal offender as

existing on a continuum, ranging from the serious, repetitive offender that begins his/her criminal career at a very young age to the adolescent-limited offender who usually begins offending during adolescence. This overview provides readers with an explanation of the elements of criminal behavior including juvenile delinquency, developmental factors, the origins of criminal behavior, biological factors, mentally disordered offender, human aggression and violence, criminal homicide and assault, offenses, economic issues, drugs and correctional psychology. Crime in a Psychological Context Academic Press

"In this text we focus on criminal behavior and antisocial behavior (because antisocial behavior is not always criminal) from a psychological perspective. More specifically, adults and juveniles who violate the law or who act antisocially are portrayed as embedded in and continually influenced by multiple systems within the psychosocial environment. Meaningful theory, well executed research, and skillful application of knowledge to the "crime problem" require an understanding of the many levels of events that influence a person's life course—from the individual

to the individual's family, peers, schools, neighborhoods, community, culture, and society as a whole"--
