## **MORENO BREWER**

**Seize the High Ground** Zero In Financial Press

This book provides a diagnosis of the central economic and financial challenges facing Caribbean policymakers and offers broad policy recommendations for promoting a sustained and inclusive increase in economic well-being. The analysis highlights the need for Caribbean economies to make a concerted effort to break the feedback loops between weak macroeconomic fundamentals, notably pertaining to fiscal positions and financial sector strains, and structural impediments, such as high electricity costs, limited financial deepening, violent crime, and brain drain, which have depressed private

investment and growth. A recurring theme in the book is the need for greater regional coordination in finding solutions to address the Caribbean's shared and intertwined macroeconomic and structural challenges. The analysis suggests that strengthening regional and global market integration of Caribbean economies would provide an impetus to sustained growth in incomes and jobs. Greater regional and global economic integration would also facilitate structural transformation and a shift toward new economic activities, resulting in more diversified and less vulnerable economies. A central challenge for the Caribbean is thus to come together as a region, overcome the limitations posed by size, and garner the benefits of globalization. Efforts should build on existing regional arrangements; accelerating progress in implementing these agreements would stimulate trade.

Policymakers could also promote deeper integration with Latin America and the rest of the world by pursuing new trade agreements, leveraging current agreements more effectively, or deepening them to include areas beyond traditional trade issues, and developing port and transport infrastructure.

Educators play a significant role in the intellectual and social development of children and young adults. Thus, it is important for next-generation teachers to have a strong educational background, as it serves as the foundation to their understanding of learning processes, leadership, and best practices in the field of education. *Innovative Practices in Teacher Preparation and Graduate-Level Teacher Education Programs* presents critical and relevant research on methods by which future educators in high-level

courses are equipped and instructed in order to promote the best experience in academic scholarship. Featuring discussion on a diverse assortment of topics, such as social justice for English language learners, field-based teacher education, and student satisfaction in graduate programs, this publication is directed at academicians, students, and researchers seeking modern research on the approaches taken by instructors to qualify and engage future educators.

#### **A Magazine of Africa for Africa**

**Handbook of Research on Multidisciplinary Approaches to Literacy in the Digital Age** Understanding and Evaluating Research: A Critical Guide aims to sensitize students to the necessity of learning how not to defer to the mysterious authority of the experts, but rather to learn how to be a critical consumer of others' research, and to gain confidence in their ability to be producers of research. Sue McGregor shows students how to be research literate, and how to find, critique and apply other people's scholarship. This textbook is grounded in a solid understanding of the prevailing research methodologies for creating new knowledge (philosophical underpinnings), which in turn dictate problem posing, theory selection, and research methods (tasks for sampling, collecting and analyzing data, and reporting results).

#### **Unleashing Growth and Strengthening Resilience in the Caribbean** Graphic Communications Group

This edited book brings together an international cast of contributors to examine how academic literacy is learned and mastered in different tertiary education settings around the world. Bringing to the fore the value of qualitative enquiry through ethnographic methods, the authors illustrate in-depth descriptions of genre knowledge and academic literacy development in first and second language writing. All of the data presented in the chapters are original, as well as innovative in the field in terms of content and scope, and thought-provoking regarding theoretical, methodological and educational approaches. The contributions are also representative of both novice and advanced academic writing experiences, providing further insights into different stages of academic literacy development throughout the career-span of a researcher. Set against the backdrop of internationalisation trends in Higher Education and the pressure on multilingual academics to publish their research outcomes in English, this volume will be of use to academics and practitioners interested in the fields of Languages for Academic Purposes, Applied Linguistics,

Literacy Skills, Genre Analysis and Acquisition and Language Education.

This manual gives a complete, detailed and up-to-date description of the Eurostat-OECD PPP Programme, including its organisation, the various surveys carried out by participating countries and the ways PPPs are calculated and disseminated. It also provides guidance on the use of PPPs.

#### **Understanding and Evaluating Research** Springer

This book explores the use of mobile devices for teaching and learning language and literacies, investigating the ways in which these technologies open up new educational possibilities. Pegrum builds up a rich picture of contemporary mobile learning and outlines of likely future developments.

#### **The Strategic Lessons Unlearned from Vietnam, Iraq, and Afghanistan** Springer Science & Business Media

The fast pace of technology in this day and age has made it difficult for individuals to stay informed without becoming lost in the folds of an information overload. Methods used to narrow down information are becoming just as important as providing the information to be discovered. The Handbook of Research on Multidisciplinary Approaches to Literacy in the Digital Age is a pivotal reference source that provides vital research on the significance of being literate in the age of speed and technology. While highlighting topics such as e-advertising, mobile computing, and visual culture, this publication explores the major issues society has in the information age and the methods of innovative achievements of public or private institutions. This book is ideally designed for researchers, academicians, teachers, and business managers seeking current research on a variety of social sciences in terms of the digital age.

Multilingual Matters

Military personnel who have experience in Afghanistan, Iraq, or Vietnam, as well as senior leaders and military historians alike, will find this book by Dr. Chris Mason thought-provoking and useful. Dr. Mason examines indigenous personnel issues at the tactical, operational, and strategic levels of war and uses empirical data and exhaustive research to argue that all three

wars were lost before the first shots were fired-not on the battlefield, but at the strategic level of war. The United States interpreted all three conflicts as insurgencies, Mason writes, when in fact all three were civil wars in which the United States took a side. Success was never possible from the outset, his provocative thesis argues, because none of the three countries were nations for which the majority of their citizens were willing to fight and die. Nation-building is a slow, evolutionary, internal process through which the political identity of the peoples within a country's borders matures over centuries...

#### **A Unifying Foundation** Springer Nature

We are all investors. We invest our time, our energy, our money. We invest every single day, as citizens, as consumers, as businesspeople. At its core, investing involves connection, exchange, and mutual benefit. Lately, however, the primary, beneficial function of investing has been overshadowed by ever-more mechanized iterations of finance. We have created funds of funds, securitizations of securitizations, and entire firms whose business is based on harvesting the advantage of microseconds of trading speed. The Nature of Investing calls for a transformation of the investment process from the roots up. Drawing on the author's twenty-plus years of leadership experience in top investment firms, the book connects real-world finance with the field of biomimicry. Citing real-life examples and discussing principles from the natural world, The Nature of Investing shows how we can create an investment framework that is different from the mechanized one currently employed. Readers will discover an approach that re-aligns investing with the world it was originally meant to serve. An approach that values resiliency over rigidity and elegant simplicity over synthetic complexity. This is the true nature of investing.

#### **Academic Literacy Development** SAGE

Across the country, our children are beginning life from very different starting points. Some have aspirations and believe they can be achieved. For too many others, aspirations are tempered, if not dashed, by the sobering realities of everyday life. These different starting points place children on distinctly different trajectories of growth and development, ultimately leading to vastly different adult outcomes. How did we get to a place where circumstances of birth have become so determinative? And what must we do, within communities and across our country, to better equalize opportunity for more Americans - both young and old?

The editors of this volume contend that if, as a nation, we do nothing, then we will continue to drift apart, placing an unsustainable strain on the nation's social fabric and the character of its democracy. Consequently, understanding the dynamics governing the distribution and transmission of opportunity – and transforming this understanding into policies and programs – is critical for not only the life outcomes of individual Americans and their children, but also the country as a whole. The goal of Educational Testing Service's Opportunity in America initiative is to explore these powerful dynamics and to describe and convey them in a way that advances the national conversation about why we must take action – and how best to do so. This volume contains 14 chapters, including an epilogue, written by leaders from a range of fields including education, economics, demography, and political science. Collectively, they not only illuminate key aspects of the problem but also offer suggestions of what policies, programs, and changes in practices could begin to reverse the trends we are seeing. Written in an engaging style, this volume constitutes an essential foundation for informed discussion and strategic analysis.

International Monetary Fund

'This is a fantastic book which provides creative and practical suggestions of how to engage all children in writing' - Sarah Martin-Denham, Senior Lecturer in Primary Education, University of Sunderland This book is a practical guide designed to stimulate story writing in the early years and primary classroom. It offers a collection of novel and effective Ideas which can be used by educators to energise, excite and motivate children to willingly write stories across the 3-11 age phase. Each chapter offers creative and innovative Ideas to get children writing stories, including: - how to help children 'see the point' of story writing - how speaking and listening, reading and phonics can be utilised to enhance written stories - how technology can facilitate refreshing story writing - how story writing can be physically interactive. By combining theory with practice, this book is ideal for those training to teach the 3 to 11 age range, those beginning their teaching career, and those who are established in their professional role. Simon Brownhill is Senior Teaching Associate at the University of Cambridge. *The Army in Space and Missile Defense* Springer

Most students, regardless of their major, need to understand information systems

and technologies and their importance to the success of business organizations. While many of today's students have lived with technology their whole lives, they do not see the connection between what they use every day and what they need to understand to be successful in the business world. Introduction to Business Information Systems, Third Canadian Edition by James Norrie, Michelle Nanjad and Mark Huber focuses on IT as a source of business value and outlines the innovative technologies, as well as the innovative ways to use technology, that help businesses excel. The goal of this book is to teach students that the effective integration of IS with knowledge can drive the creation of significant business value. Introduction to Business Information Systems, Third Canadian Edition is written for both the IT and non-IT major. It is written in a friendly, accessible style that will draw students in and engage them with the content. Expanded coverage of highly technical concepts is included in the Technology Core box found in each chapter as well as the Tech Guides.

#### Changing Cultures in Higher Education

Government Printing Office  
Qualitative researchers have grappled with how online inquiry shifts research procedures such as gaining access to spaces, communicating with participants, and obtaining informed consent. Drawing on a multimethod approach, *Conducting Qualitative Research of Learning in Online Spaces* explores how to design and conduct diverse studies in online environments. Authors Hannah R. Gerber, Sandra Schamroth Abrams, Jen Scott Curwood, and Alecia Marie Magnifico focus on formal and informal learning practices that occur in evolving online spaces. The text shows researchers how they can draw upon a variety of theoretical frameworks, methodological approaches, and data sources. Examples of qualitative research in online spaces, along with guiding questions, support readers at every phase of the research process.

"A gifted and thoughtful writer, Metzl brings us to the frontiers of biology and technology, and reveals a world full of promise and peril." — Siddhartha Mukherjee MD, New York Times bestselling author of *The Emperor of All Maladies* and *The Gene* Passionate, provocative, and highly illuminating, *Hacking Darwin* is the must read book about the future of our species for fans of *Homo Deus* and *The Gene*. After 3.8 billion years humankind is about to start evolving by new rules... From leading geopolitical expert and technology futurist Jamie Metzl comes a groundbreaking exploration of the many ways genetic-engineering is shaking the core foundations of our lives — sex, war, love, and death. At the dawn of the genetics revolution, our DNA is becoming as readable, writable, and hackable as our information technology. But as humanity starts retooling our own genetic code, the choices we make today will be the difference between realizing breathtaking advances in human well-being and descending into a dangerous and potentially deadly genetic arms race. Enter the laboratories where scientists are turning science fiction into reality. Look towards a future where our deepest beliefs, morals, religions, and politics are challenged like never before and the very essence of what it means to be human is at play. When we can engineer our future children, massively extend our lifespans, build life from scratch, and recreate the plant and animal world, should we?

choice, and look up the correct information on where and what to study.

Genetic Engineering and the Future of Humanity Sourcebooks, Inc.

Although we have been successful in our careers, they have not turned out quite as we expected. We both have changed positions several times-for all the right reasons-but there are no pension plans vesting on our behalf. Our retirement funds are growing only through our individual contributions. Michael and I have a wonderful marriage with three great children. As I write this, two are in college and one is just beginning high school. We have spent a fortune making sure our children have received the best education available. One day in 1996, one of my children came home disillusioned with school. He was bored and tired of studying. "Why should I put time into studying subjects I will never use in real life?" he protested. Without thinking, I responded, "Because if you don't get good grades, you won't get into college."

"Regardless of whether I go to college," he replied, "I'm going to be rich."

*Fostering Integrity in Research* IGI Global  
"[Seize the high ground is a] narrative history of the Army's aerospace experience from the 1950s to the present. The focus is on ballistic missile defense, from the early NIKE-HERCULES missile

program through the SAFEGUARD acquisition site allowed by the 1972 ABM Treaty to the more advanced 'Star Wars' concepts studies toward the end of the century. [What is] covered is not only the technological response to the threat but the organizational and tactical development of the commands and units responsible for the defense mission"--CMH website.

Moto OECD Publishing

Prosperity resides where prayerful planning, financial freedom, and radical relationships intersect. ★ Do you want to know the best way to build wealth? ★ Do you have a healthy connection with all financial matters? ★ Have you ever wondered what the Bible has to say about money? ★ Would you like to have contentment in every aspect of life, at work and home, with family and friends, at church, and in your community? ★ Do you want to know how to better manage money? If you do, this book is for you. God wants you to have a solid plan to live the life you were made for. That foundation begins and ends with Him. In this first book of the series, INTERSECTION - Where God's Wealth Meets God's Wisdom, you will discover how to live in your purpose at the intersection of faith and strategy. This is financial literacy 101 and you will find

many of the verses about finances in the Bible. Here are some of the faith + strategy intersections you will read about and be able to apply immediately: · Your dreams + Your life · Prayer + Patience · Your destiny + God's will for your life · King Jesus + Servant Jesus · What is Your Purpose? + What is Your Position? · and many more! The scriptures teach us to be in a relationship with God, not religion. Your Heavenly Father wants you to live a prosperous life, and the Bible teaches you the proper way to handle that wealth. And the final four chapters of this book will show you how financial prosperity and the fruit of the Spirit intersect. Once you understand and begin living by these foundational truths, your heart will overflow with love, joy, and peace. Your actions will be purposeful with patience, kindness, and goodness. And your thoughts will be faithful and meek with self-control. "Jesus called us by his glory and goodness. Through his glory and goodness, he gave us the very great and rich gifts he promised us." - 2 Peter 1:3b-4a ICB These are not only Christian financial concepts and principles; these are financial truths. It's time for you to RECOVER, GROW, and ZERO IN on your financial target. Start reading and begin living at the INTERSECTION of Biblical Faith and Financial Strategy.
