We Listened. You Want Science. You Want a Modern Framework. You Want an Easy Prep. You Want Passer/Smith. WE LISTENED: During the development of Passer/Smith, McGraw-Hill employees observed more than 150 hours of Introductory Psychology classes, hosted three national symposia, and commissioned and read over 200 reviews. From that, WE LEARNED: • You want to demonstrate to your students that Psychology is a science. Passer's Research Close-Ups in each chapter provide an inside look at research studies in a scientific journal format. • You want a framework that will help students tie all of the disparate concepts together and see the field of psychology in a modern way. Passer/Smith's Levels of Analysis feature does just that, by consistently showing the biological, psychological, and environmental causes of behavior. • You want all of your resources in one place so you can quickly and easily prep for each lecture. McGraw-Hill's PrepCenter provides all of our instructor resources in an easy-to-use, online site. The bottom line is that if you use Passer/Smith, you'll teach a dynamic, modern course with an organizing framework that reflects psychology as a science and that is easier to prep for than your present course.

Why Myers? David Myers has become the world's best-selling introductory psychology author by serving the needs of instructors and students so well. Each Myers textbook offers an impeccable combination of up-to-date research, well-crafted pedagogy, and effective media and supplements. Most of all, each Myers text demonstrates why this author's style works so well for students, with his signature compassionate, companionable voice, and superb judgment about how to communicate the science of psychology and its human impact. Why Modules? This modules-based version of Myers' best-selling, full-length text, Psychology (breaking down that book's 16 chapters into 59 short modules) is yet another example of the author's ability to understand what works in the classroom. It comes from Myers' experiences with students who strongly prefer textbooks divided into briefer segments instead of lengthier chapters, and with instructors who appreciate the flexibility offered by the modular format. Modular organization presents material in smaller segments. Students can

easily read any module in a single sitting. Self-standing modules. Instructors can assign modules in their own preferred order. The modules make no assumptions about what students have previously read. Illustrations and key terms are repeated as needed. This modular organization of short, stand-alone text units enhances teacher flexibility. Instead of assigning the entire Sensation and Perception chapter, instructors can assign the module on vision, the module on hearing, and/or the module on the other senses in whatever order they choose. Watch our new videos from David Myers here, including our animation on THE TESTING EFFECT narrated by David Myers.

Once there were two sisters born with a bond so strong that it forged them together forever. Roa and Essie called it the hum. It was a magic they cherished—until the day a terrible accident took Essie's life and trapped her soul in this world. Dax—the heir to Firgaard's throne—was responsible for the accident. Roa swore to hate him forever. But eight years later he returned, begging for her help. He was determined to dethrone his cruel father, under whose oppressive reign Roa's people had suffered. Roa made him a deal: she'd give him the army he needed if he made her queen. Only as queen could she save her people from Firgaard's rule. Then a chance arises to right every wrong—an opportunity for Roa to rid herself of this enemy king and rescue her beloved sister. During the Relinquishing, when the spirits of the dead are said to return, Roa discovers she can reclaim her sister for good. All she has to do is kill the king.
