This text is designed to provide insight into the transactional legal needs of the entrepreneur. It is written to provide both business and law students with a foundational understanding of the doctrinal areas of the law that impact the entrepreneurial endeavor. Substantively, coverage begins with taking the entrepreneur from the initial business plan through choice of business entity and corporate governance considerations. It then moves to address the use, analysis, and drafting of transactional documents typically used in the conduct of business. This is followed by chapters covering applied intellectual property law and protection of intellectual property. Coverage concludes with a focus on methods of financing the business entity.

Annotation. International Financial Reporting Standards (IFRS) in a business situation can have a significant effect on the financial results and position of a division or an entire business enterprise. 'International Financial Reporting Standards: A Practical Guide' gives private or public sector executives, managers, and financial analysts without a strong background in accounting the tools they need to participate in discussions and decisions on the appropriateness or application of IFRS. Each chapter summarizes

an International Financial Reporting Standard, following a consistent structure:

- Problems addressed by the IFRS
- Scope of the Standard
- Key concepts and definitions
- Accounting treatment
- Presentation and disclosure
- Financial analysis and interpretation.

Based on the ACM model curriculum guidelines, this text covers the fundamentals of computer science required for first year students embarking on a computing degree. Data representation of text, audio, images, and numbers; computer hardware and software, including operating systems and programming languages; data organization topics such as SQL database models - they're all [included]. Progressing from the bits and bytes level to the higher levels of abstraction, this birds-eye view provides the foundation to help you succeed as you continue your studies in programming and other areas in the computer field.- Back cover.

International Financial Reporting Standards Springer Nature
Organized topically rather than historically, this book provides an excellent introduction to the subject of African Philosophy. Samuel Oluoch Imbo synthesizes the ideas of key African philosophers into an accessible narrative. The author focuses on five central questions: What are the definitions of African philosophy? Is ethno-philosophy really philosophy? What are the dangers of an African philosophy that claims to be 'unique'? Can African philosophy be done in foreign languages such as English and French? Are there useful ways to make connections between African philosophy, African American philosophy, and women's studies? By making cross-disciplinary and transnational connections, Imbo stakes out an important place for African philosophy. Imbo's book is an invaluable introduction to this dynamic and growing area of study.

General Principles of Commercial Law Routledge
Principles of External Auditing has become established as one of the leading textbooks for students studying auditing. Striking a careful balance between theory and practice, the book describes and explains, in non-technical language, the nature of the audit function and the principles of the audit process. The book covers international auditing and accounting standards and relevant statute and case law. It explains the fundamental concepts of auditing and takes the reader through the various stages of the audit process. It also discusses topical aspects of auditing such as legal liability, audit risk, quality control, and the impact of information technology. Brenda Porter is currently visiting Professor at Exeter University and Chulalongkorn University, Bangkok.

Entrepreneurial Law Pearson Higher Ed
"The law of persons is a dynamic area of the law, and it is this dynamic nature that generates interest in this subject and makes it stimulating to teach and learn. Law of Persons seeks to make this subject area accessible to students, including first-year students. In the law of persons, the common law and legislation have been harmonised with the spirit, purport and objects of the Bill of Rights, while the values entrenched in the Constitution are permeating every area of the law. The greatest change in our law of persons to date has been the Children's Act 38 of 2005: it had redefined basic concepts, it has revolutionised the parent-child relationship, it has ended the labelling of children in terms of their parents' marital status and it has radically altered the legal status of unmarried fathers. Law of Persons is also available in Afrikaans, and should ideally be used in conjunction with Personeregbronnebundel / Law of Persons Sourcebook"--Provided by publisher.

Many lawyers, especially those dealing with commercial matters, need to understand accounting yet feel on shaky ground in the area. This book is written specifically for them. It breaks down and makes clear basic concepts (such as the difference between profit and cash flow), the accounting profession and the legal and regulatory framework within which accounting operates. The relevant provisions of the Companies Act 1985 are discussed at some length. Holgate explains generally accepted accounting principles in the UK (GAAP), the trend towards global harmonisation and the role of international accounting standards. He then deals with specific areas such as group accounts, acquisitions, tax, leases, pensions, financial instruments, and realised profits, focusing in each case on those aspects that are likely to confront lawyers in their work. This book will appeal to the general practitioner as well as to lawyers working in corporate, commercial, and tax law.

Accounting Principles for Lawyers Corwin Press
This book is not merely a new edition, but a complete and significantly expanded rewrite. It comprises over 900 pages of expert and in-depth exposition of this complex subject that has become so important in the modern global economy. Already established over four previous editions as the pre-eminent work on the subject it is a 'must-own book' for all students and practitioners of tax, whether from a legal, business or accounting perspective. Professor Lynette Olivier and Michael Honiball are without peer in their understanding and clarity in this highly specialised field. Five new chapters have been added on: Taxation of individuals; Taxation of Companies and Dividends; Taxation of Partnerships; Cross-border VAT; and Interpretation of Statutes.

Cost and Management Accounting Taylor & Francis
Addressing the increasing number of culturally and linguistically diverse students in today's schools, this book provides general and special education teachers with the knowledge, skills, and strategies to make the proactive, active, and reactive interventions necessary to create a positive classroom environment in which all students can learn.

Personal Financial Management Chapman and Hall/CRC
This authors of this text recognize the need to standardize accounting practices. Adopting a critical viewpoint, they examine the theories and aim to illustrate aspects of South African accounting statements and guidelines and give background information on controversial issues.

Behavior and Classroom Management in the Multicultural Classroom Cambridge University Press
Research in macroeconomics in the last thirty years has featured, almost exclusively on two characteristics: an emphasis on the microfoundations of macroeconomics and secondly, intertemporal economics, that is, the behavior of economic actors over time. Curiously, textbooks in intermediate macroeconomics have been very slow to adopt these traits. The aim of this book is to bring intermediate instruction in macroeconomics fully into line with the direction taken by the research community. Key

hallmarks of the text include: a full introduction to the microfoundations of consumption and investment a complete model of the labor market with profit maximization for firms to determine labor demand and a utility maximization model to determine labor supply an analysis of the Baumol-Tobin model to determine money demand accompanied by a discussion of traditional money supply Possessing a full range of additional learning features including a companion website, test bank and instructor's manual, the book takes an international view of macroeconomics with case studies and examples from the United States and beyond.

Academic Literacy Development West Academic Publishing Closing the books is one of the key functions of the accounting department. Closing the Books reveals how to do so promptly and accurately, so that financial statements can be issued shortly after the end of the reporting period. The book discusses the entire process of how information is summarized into the financial statements, as well as the many reporting formats that are available. It covers the full range of closing steps, and shows how to fine-tune the closing process to achieve a shorter close. In addition, the book addresses the controls and record keeping needed for the closing process.

"Economics for South African students is a comprehensive introduction to economics in general, set against a contemporary South African background. The easy style and many practical examples make this publication extremely accessible. The book covers all the material usually prescribed for introductory courses, and it lays a solid foundation for intermediate and advanced studies in economics. The fifth edition is a restructured, thoroughly revised and updated version of the popular fourth edition. As in the previous editions, the emphasis is on the application of economic theory. A wealth of relevant information about the South African economy is also provided. This book is also available in Afrikaans. South African workbook for economics is an additional resource that students can purchase at their local bookstore or online retailer. Please visit www.vanschaiknet.com for information on core and supplementary Economics I products."--Publisher's description.
