The Economics of Information

Technology BoD – Books on Demand

'Business Economics: Theory and Application' is an undaunting and accessible text that focuses on the real world of business and how this relates to economics. The links to business are far more intrinsic than in other business economics textbooks where a business "flavour" is simply added to traditional economics theory. It provides an in-depth jargon-free analysis, particularly relevant for one semester courses. A variety of case studies and questions are used throughout the text both to illustrate key points and for seminar and assignment work. Diagrams are included to aid the explanation of complex issues, and review and discussion questions are incorporated to consolidate and expand on the learning. A lecturer's supplement accompanies the text. [Business Economics](#) CRC Press

The recent financial crisis has sparked debates surrounding the nature and role of accounting in informing capital markets and regulatory bodies about the financial performance and position of a firm. These debates have drawn attention to the broader implications of accounting for the economy and society. Accounting and Business Economics brings together leading international scholars to examine the current state of accounting theory and its fundamental

connection with the economics and finance of firms, viewing the business entity from not only accounting, but also national, economic, social, political, juridical, anthropological, and moral points of view.

Today, it is considered good business practice for tourism industries to support their micro and macro environment by means of strategic perspectives. This is necessary because we cannot contemplate companies existing without their environment. If companies do not involve themselves in such undertakings, they are in

danger of isolating themselves from the shareholder. That, in turn, creates a problem for mobilizing new ideas and receiving feedback from their environment. In this respect, the contributions of academics from international level together with the private sector and business managers are eagerly awaited on topics and sub-topics within Strategies for Tourism Industry - Micro and Macro Perspectives.

First published as 'Markets for Managers', this book has proved to be a popular way for non-economists to understand and apply the key tools of economics. Professor Anthony J. Evans, one of Europe's leading Managerial Economics instructors, brings the content that works in his classrooms to an even wider audience. Written in an engaging and informal way, whether you are a busy executive or simply an interested amateur this is your go-to guide. In this revised and updated edition, you will be led through the building blocks of economic theory and how they relate to the real world. You will see

how thinking like an economist can improve your decision making, and how markets can be used to generate value within organizations and in society at large. The book incorporates the main principles of both micro and macroeconomics and takes a broad and diverse approach. In it you will encounter the most interesting economists and understand their contributions in a historical context. The practical format is perfect for professionals and students who want to gain an applied perspective on today's most pressing economic issues.

The Essence of Business Economics

This textbook provides future data analysts with the tools, methods, and skills needed to answer data-focused, real-life questions; to carry out data analysis; and to visualize and interpret results to support better decisions in business, economics, and public policy. Data wrangling and exploration, regression analysis, machine learning, and causal analysis are comprehensively covered, as well as when, why, and how the methods work, and how they relate to

each other. As the most effective way to communicate data analysis, running case studies play a central role in this textbook. Each case starts with an industry-relevant question and answers it by using real-world data and applying the tools and methods covered in the textbook. Learning is then consolidated by 360 practice questions and 120 data exercises. Extensive online resources, including raw and cleaned data and codes for all analysis in Stata, R, and Python, can be found at www.gabors-data-analysis.com.

This book is a collection of high-impact papers accepted and presented at the 2019 Vietnam's Business and Economics Research Conference (VBER2019) organised by Ho Chi Minh City Open University held on 18th–20th July 2019. The Special Issue is associated

with a broad coverage of the contemporary issues in Business and Economics in Vietnam and other emerging markets reflecting a key theme of VBER2019: Vietnam's Place in the Asia Pacific Region. A total of 14 papers were published from more than the 120 submissions to the VBER2019 Conference. Published papers had been undergone a rigorous reviewing process conducted by the Journal of Risk and Financial Management. The papers incorporated in this book address contemporary issues in business and economics from Vietnam and other emerging markets in the Asian region from various angles such as economics, finance, and statistics to management science. At the time of writing this note, some of the papers have attracted more than 1000 downloads in 3 months. In particular, a paper on "Foreign Direct Investment and Economic Growth from Developing Countries in the Short Run and Long Run" by Trang Thi-Huyen Dinh and her team has attracted almost 6000 downloads in 3 months. These statistics indicate that the papers published in this Special

Issue have attracted the wide interest of readers. Among these 14 published papers, three main areas of important contemporary issues in Business and Economics in the Asian region can be identified. First, a block of papers deals with various important and fundamental issues in the emerging markets the Asian region, from exchange rate regime, financial inclusion, and financial development to energy consumption and environmental degradation. On the issue of CO₂ emissions, energy consumption and economic growth in the ASEAN, Vo, Vo, and Le utilized various time series econometrics approaches. Key findings from this paper indicate that there are no long-run relationships among carbon dioxide (CO₂) emissions, energy consumption, renewable energy, population growth, and economic growth in the Philippines and Thailand, but a relationship does exist in Indonesia, Myanmar, and Malaysia. Loo, in his paper on financial inclusion for the ASEAN, concluded that advancing internet capability and availability present investors an opportunity to offer

financial technology or Fintech to meet the need for financial services in this digital era. Second, a challenge in quantitative studies for a single country, such as Vietnam, with limited data is generally noted. However, various empirical studies on Vietnam's business and economics issues have been conducted. Nguyen, Quan, and Pham examined the cultural distance and entry mode of foreign direct investment in Vietnam. A key finding from their paper is that when there is a great cultural difference between Vietnam and their home country, foreign-invested firms prefer wholly owned subsidiaries over equity joint ventures. Within the Vietnamese market, Pham, Vo, Ho, and McAleer conducted a study on the issue of corporate financial distress. The authors conclude that the corporate financial distress prediction model, which includes accounting factors with macroeconomic indicators, performs much better than alternative models. In addition, the evidence confirms that the global financial crisis (GFC) had a damaging impact on each sector,

with the Health & Education sector demonstrating the most impressive recovery post-GFC, and the utilities sector recording a dramatic increase in bankruptcies post-GFC. At another extreme of the spectrum, Van and Nguyen considered that competitive context, social influences, the understanding of managers about corporate social responsibility (CSR), and the internal environment of companies are the four drivers of CSR. The authors also argued that in the four drivers, competitive context has the strongest impact on adopting CSR. Third, last but not least, various papers focus on an important aspect of public finance. For an example, Pham, Pham, and Ly documented the effect of double taxation treaties on the bilateral trade of Vietnam with ASEAN member states, thereby making an extensive comparison with its EU partner countries. Their findings indicate the significant contributions of the tax treaties to Vietnam's trade performance, not exclusively with ASEAN but also with EU partner countries. In addition,

regarding public finance for Vietnam, Nguyen, Vo, Ho, and Vo investigated the contribution of fiscal decentralisation to economic growth across provinces in Vietnam. For the first time in Vietnam, the fiscal decentralisation index together its two subcomponents, including fiscal importance and fiscal autonomy, are developed. Findings from this paper indicate that while fiscal importance and an overall level of fiscal decentralisation have provided negative impact on provincial economic growth, fiscal autonomy has a positive impact on economic growth across provinces in Vietnam.

This textbook introduces readers to practical statistical issues by presenting them within the context of real-life economics and business situations. It presents the subject in a non-threatening manner, with an emphasis on concise, easily understandable explanations. It has been designed to be accessible and student-friendly and, as an added learning feature, provides all the relevant data required to complete the accompanying exercises

and computing problems, which are presented at the end of each chapter. It also discusses index numbers and inequality indices in detail, since these are of particular importance to students and commonly omitted in textbooks. Throughout the text it is assumed that the student has no prior knowledge of statistics. It is aimed primarily at business and economics undergraduates, providing them with the basic statistical skills necessary for further study of their subject. However, students of other disciplines will also find it relevant.

Data Analysis for Business, Economics, and Policy John Wiley & Sons

This book bridges the disciplines of economics and marketing and brings them to bear on the analysis of contemporary business problems. The world has changed dramatically over the last four decades. Sociologically, technologically, economically and politically speaking the world is changing at an increasing pace. The spread of ideas and values are reinforcing the impact of globalization on various business

operations and activities. As the late Peter Drucker once remarked: "while you were out the world changed." To make sense of to the world we live in, we are compelled to draw from diverse disciplines and subjects. This book focuses on the contributions of economics and marketing. The basic principles, theories and issues of economics are selected and are integrated with key elements and principles of marketing. Marketers, in conventional as well as in digital markets, are encouraged to integrate marketing with economics in order to make successful and effective business decisions. Marketing and Economics are subjects dealing with business – business of private firms, not-for-profit organisations and that of government. Economics involves allocation of scarce resources. Scarcity in economics is relative scarcity, scarcity in relation to demand. Written in a casual, accessible language and taking very little for granted, this book is for anyone who is curious about economics and marketing. It provides the essential analytical framework necessary for

thriving in today's business. In its diverse chapters it covers topics such as offshoring, the circular economy, benchmarking, mergers and acquisitions, knowledge and innovation, services industries, customer relationships, advertising and communication, among others. It is particularly well suited to undergraduates in business or economics and its fresh perspectives on today's challenges would be of interest to business managers and marketing professionals. *Business Economics (For CA Foundation), 5e* Oxford University Press
