A Comprehensive Guide Routledge
 An inclusive as possible collection of citations and characteristics of the Native American mounds in the continental United States. *Inventing Post-Traumatic Stress Disorder* Taylor & Francis
 Five years in the writing by one of science fiction's most honored authors, *Doomsday Book* is a storytelling triumph. Connie Willis draws upon her understanding of the universalities of human nature to explore the ageless issues of evil, suffering and the indomitable will of the human spirit. For Kivrin, preparing an on-site study of one of the deadliest eras in humanity's history was as simple as receiving inoculations against the diseases of the fourteenth century and inventing an alibi for a woman traveling alone. For her instructors in the twenty-first century, it meant painstaking calculations and careful monitoring of the rendezvous location where Kivrin would be received. But a crisis strangely linking past and future strands Kivrin in a bygone age as her fellows try desperately to rescue her. In a time of superstition and fear, Kivrin—barely of age herself—finds she has become an unlikely angel of hope during one of history's darkest hours. Praise for *Doomsday Book* “A stunning novel that encompasses both suffering and hope. . . . The best work yet from one of science fiction's best writers.”—The Denver Post “Splendid work—brutal, gripping and genuinely harrowing, the product of diligent research, fine writing and well-honed instincts, that should appeal far beyond the normal science-fiction constituency.”—Kirkus Reviews (starred review) “The world of 1348 burns in the mind's eye, and every character alive that year is a fully recognized being. . . . It becomes possible to feel . . . that Connie Willis did, in fact, over the five years *Doomsday Book* took her to write, open a window to another world, and that she saw something there.”—The Washington Post *Book World*

 It is with considerable diffidence that I publish these pages; the subject with which they deal is so vast, and I have had to prosecute it under circumstances so disadvantageous, that I can hope but for small measure of success. When I may be better equipped for the task, and after further study has enabled me to fill up the gaps DEGREES left in the present work, I hope to make

it a more worthy contribution to this neglected department of Muhammadan history; and to this end I shall be deeply grateful for the criticisms and corrections of any scholars who may deign to notice the book. To such I would say in the words of St. Augustine: " Qui haec legens dicit, intelligo quidem quid dictum sit, sed non vere dictum est; asserat ut placet sententiam suam, et redarguat meam, si potest. Quod si cum caritate et veritate fecerit, mihique etiam (si in hac vita maneo) cognoscendum facere curaverit, uberrimum fructum laboris huius mei cepit"

 DON'T MISS BRIDGE OF CLAY, MARKUS ZUSAK'S FIRST NOVEL SINCE THE BOOK THIEF AND AN UNFORGETTABLE AND SWEEPING FAMILY SAGA. From the author of the extraordinary #1 New York Times bestseller *The Book Thief*, *I Am the Messenger* is an acclaimed novel filled with laughter, fists, and love. A MICHAEL L. PRINTZ HONOR BOOK FIVE STARRED REVIEWS Ed Kennedy is an underage cabdriver without much of a future. He's pathetic at playing cards, hopelessly in love with his best friend, Audrey, and utterly devoted to his coffee-drinking dog, the Doorman. His life is one of peaceful routine and incompetence until he inadvertently stops a bank robbery. That's when the first ace arrives in the mail. That's when Ed becomes the messenger. Chosen to care, he makes his way through town helping and hurting (when necessary) until only one question remains: Who's behind Ed's mission?
Mountains Painted with Turmeric Cambridge University Press
 China's rapid economic growth over the past three decades has endowed it with enormous power. Chinese leaders now want to harness this power to become the world's dominant country, replacing the US as the global superpower. In *How China Loses*, Luke Patey argues that despite all its strengths, China cannot simply get what it wants. The ambitiousness of China's global economic agenda and pursuit of military expansion are undermining its ability to realize its geopolitical plans; other countries are beginning to resist. Weaving together on-the-ground reportage and analysis from Africa to Latin America, East Asia to Europe, Patey explores how the world is responding to China's rise and what this means for everyone.

 As far back as we know, there have been individuals incapacitated by memories that have filled them with sadness and remorse, fright and horror, or a sense of irreparable loss. Only recently, however, have people tormented with such recollections been diagnosed as suffering from "post-traumatic stress disorder." Here Allan Young traces this malady, particularly as it is suffered by Vietnam veterans, to its beginnings in the emergence of ideas about the unconscious mind and to earlier manifestations of traumatic memory like shell shock or traumatic hysteria. In

Young's view, PTSD is not a timeless or universal phenomenon newly discovered. Rather, it is a "harmony of illusions," a cultural product gradually put together by the practices, technologies, and narratives with which it is diagnosed, studied, and treated and by the various interests, institutions, and moral arguments mobilizing these efforts. This book is part history and part ethnography, and it includes a detailed account of everyday life in the treatment of Vietnam veterans with PTSD. To illustrate his points, Young presents a number of fascinating transcripts of the group therapy and diagnostic sessions that he observed firsthand over a period of two years. Through his comments and the transcripts themselves, the reader becomes familiar with the individual hospital personnel and clients and their struggle to make sense of life after a tragic war. One observes that everyone on the unit is heavily invested in the PTSD diagnosis: boundaries between therapist and patient are as unclear as were the distinctions between victim and victimizer in the jungles of Southeast Asia.

Boats on Land is a unique way of looking at India's northeast and its people against a larger historical canvas—the early days of the British Raj, the World Wars, conversions to Christianity, and the missionaries. This is a world in which the everyday is infused with folklore and a deep belief in the supernatural. Here, a girl dreams of being a firebird. An artist watches souls turn into trees. A man shape-shifts into a tiger. Another is bewitched by water fairies. Political struggles and social unrest interweave with fireside tales and age-old superstitions. *Boats on Land* quietly captures our fragile and awkward place in the world.
Fatehpur Sikri Routledge
Karnali Blues, by Buddhisagar, is the most widely read Nepali novel to have appeared in the last twenty years. As it recounts the evolution of a father-son relationship—a son's search for approval, a father's small acts of kindness and forgiveness, a son's fears for his father's dignity as his fortunes and faculties begin to fail—the reader is deeply drawn into young Brisha Bahadur's world. His father is kind and idealistic; his mother, though she is kind too, is often frustrated and irascible. The characters in this book are some of the most carefully drawn and authentic in all of Nepali literature. In a backwater district of a country about to undergo radical social, political and cultural change, Brisha's dreams, his games and his mischief, his loves,

his hopes and his fears come alive. Translated from the Nepali by Michael Hutt, this highly original piece of work, with the simplicity of its language and its emotional range, holds the power to take your breath away. Its principal themes—the love between a son and his father, the joys and sorrows of childhood, the daily struggle for survival—are universal, and will resonate with readers the world over.

Tense Past provides a much needed appraisal and contextualization of the upsurge of interest in questions of memory and trauma evident in multiple personality and post-traumatic stress disorders, child abuse, and commemoration of the Holocaust. Contributors examine the historical origins of memory in psychiatric discourse and show its connection to broader developments in Western science and medicine. They address the new links between trauma and memory, and they explore how memory shapes the way traumatic events are put into narrative form. They also consider the social and political contexts in which sufferers speak and remember.

Psychiatric classifications created in one culture may not be as universal as we assume, and it is difficult to determine the validity of a classification even in the culture in which it was created.

Culture and Panic Disorder explores how the psychiatric classification of panic disorder first emerged, how medical theories of this disorder have shifted through time, and whether or not panic disorder can actually be diagnosed across cultures. In this breakthrough volume a distinguished group of medical and psychological anthropologists, psychiatrists, psychologists, and historians of science provide ethnographic insights as they investigate the presentation and generation of panic disorder in various cultures. The first available work with a focus on the historical and cross-cultural aspects of panic disorders, this book presents a fresh opportunity to reevaluate Western theories of panic that were formerly taken for granted.
