A houseful of clutter may not be the only reason people pack on extra pounds, but research proves that it plays a big role. A recent study showed that people with supercluttered homes were 77 percent more likely to be overweight or obese! Why? Author Peter Walsh thinks it's because people can't make their best choices--their healthiest choices--in a cluttered, messy, disorganized home. In *Lose the Clutter, Lose the Weight*, organizing guru Walsh comes to the rescue with a simple 6-week plan to help readers:

- Clear their homes of excess "stuff" as they discover their vision for their personal space
- Clear their bodies of excess pounds as they follow a healthy, supersimple eating and exercise plan
- Clear their minds and spirits of the excess weight of too many possessions

All the pieces are connected--and Walsh weaves them together for a 6-week program that leads readers step-by-step through decluttering their homes, their bodies, and their lives. Rodale took the program for a testdrive with two dozen volunteers who followed his plan. All reported great results--from significant weight loss to calmer minds and more organized, happier, and more efficient lives. With a room-by room organizing guide, plus supersimple recipes and an easy exercise plan, *Lose the Clutter, Lose the Weight* is the only book to help readers clear the clutter while they zap the pounds all at the same time.

"Life of the Trail" is a fascinating series that guides today's hikers and armchair travelers through the stories of historic routes in the Canadian Rockies. When authors Emerson Sanford and Janice Sanford Beck began backpacking together nearly 20 years ago, they often wondered whose footsteps they were retracing and how today's trails through the Rockies came to be there. In "Life of the Trail," they share their findings with adventurers and history buffs alike. "Life of the Trail 4: Historic Hikes in Eastern Jasper National Park" includes trails throughout the Jasper area, as well as routes outside the national park itself. The main routes are fur trade routes, Duncan McGillivray's route along the Brazeau river and Poboktan Creek, Jacques Cardinal's route from Jasper to the North Saskatchewan River along the South Boundary Trail and over Job Pass, and Old Klyne's Trail over Maligne and Cataract Passes and along the Cline River to the Kootenay Plains. The fourth is a 20th-century route: the Skyline Trail.

Anyone who has tried to slim down is used to adding (calories, points, fat grams, net carbs) and subtracting (pounds, inches, dress sizes). But all that diet math rarely results in long-lasting weight loss. To be successful on The One One One Diet, readers only need to count to one: one protein, one carb, and one fat at every meal. For over 12 years, nutritionist Rania Batayneh has used this plan with more than 800 clients, and they've collectively dropped thousands of pounds permanently. The One One One Diet isn't another get-slim-quick fad, but rather gives readers the tools to eat healthfully for life. As long as readers stick to the ratio, nothing is off limits. Craving pizza? The crust (carb), sausage (protein), cheese (fat), and free veggies combine for a balanced, satisfying meal. Holiday family meals? Roast beef (protein), mashed potatoes (carb), gravy (fat), and green beans (free veggies) are on the table. The plan is perfectly adaptable to every lifestyle, food preference, cuisine, and personality. To illustrate how flexible and delicious this plan can be, Rania shares 75 recipes that she developed for her healthy meal catering service. Dishes such as Sumac-Infused Chicken Wraps, Butternut Squash Chickpea Curry, and Zucchini Chip Muffins are fast and easy to make and definitely don't taste like diet food. With The One One One Diet, readers will enhance overall wellness, lower cholesterol and blood pressure, increase energy and alertness, and reach their goal weight for good.

Americans are getting fatter. A third of them are now obese—not just a few pounds overweight, but heavy enough to put their health in jeopardy. But, one state bucks the trend. Colorado is the leanest state in the nation, but not because of something in the air or the water. Rather, it's where diet, activity, and environment perfectly intersect. From their Denver-based research facility, leading weight-loss experts Dr. James Hill and Dr. Holly Wyatt set out to discover why Coloradans are so slim and how they stay that way. They studied the patients in their weight-loss clinic along with the lean people of Colorado. They also looked for clues in the National Weight Control Registry, a scientific database of thousands of successful "losers" across the country who have dropped an average of 70 pounds and kept it off for 6 years. Their comparison of these groups led to an aha moment—the discovery

of 6 simple habits that keep people in a state of slim. With proof that you can live like a lean Coloradan anywhere, Hill and Wyatt used those 6 habits as the foundation for their revolutionary plan, the Colorado Diet. Unlike most "diets," this one reveals the secrets of people who are in the state of slim, whether it's because they've always been slender or because they've lost weight and kept it off over the long term. This is critical, because what you need to do to for long-term weight maintenance is different from what you do to lose weight. You must repair your metabolism. If you don't, you can drop pounds, but you won't keep them off. The NWCR participants and Colorado residents had intuitively uncovered the right blend of food, activity, and habits that keep metabolism in top working order. Follow their lead, and you'll be able to actually eat more food and still stay at a healthy weight. The Colorado Diet is divided into three phases with very clear objectives: Reignite, Rebuild, and Reinforce your metabolism. In the Reignite and Rebuild phases, you'll drop 20 pounds in just 8 weeks as you discover how to eat and move so that you are working with, rather than against, your body's metabolism. With a new, flexible metabolism, you'll progress into the Reinforce phase, where you'll continue to lose weight and solidify your new lifestyle. Along the way, you'll learn how to make changes in your environment and your mind-set so they support, rather than thwart, your success. By following the Colorado Diet, you'll get your body into a State of Slim for good. *Boys' Life* Rodale

Richard Kadrey's Sandman Slim—aka James Stark—is, quite simply, one of the most outrageous uber-anti-heroes ever to kick serious butt on this or any other world or dimension. In his previous three adventures—Sandman Slim, Kill the Dead, and Aloha from Hell—Stark has fled Hell for California, taken on angels, demons, outlaw bikers, zombies, covert government operatives, and all manner of monsters, while saving humankind from total annihilation on numerous occasions. But in *Devil Said Bang*, he finally assumes the role he was destined for: as the new Lucifer, ruler of the Underworld. Combining outrageously edgy humor with a dark and truly twisted vision, Richard Kadrey has once again delivered a masterful amalgam of action novel, urban fantasy, and in-your-face horror that will delight a wide range of readers—from Christopher Moore and Warren Ellis fans to the devoted adherents of Jim Butcher, Charlaine Harris, Kim Harrison, and Simon Green.

As our knowledge of the human body becomes ever more exact, scientists have made remarkable leaps forward in many fields. Yet for one question that many of us would like answered—What causes the body to burn fat?—we find all sorts of confusing claims. Since we know so much about how our body works, can't science tell us the answer? As it turns out, science already has. I have spent over ten years reading thousands of fat-loss studies. Not theories promoted by diet gurus. Only the proven data. My investigation uncovered all kinds of scientific findings: - Studies stating how certain foods cripple our ability to burn fat - Scientists showing how to burn fat while eating more food - Researchers revealing how to get all the benefits of traditional exercise in a tenth of the time - Physiologists finding out how eating less sets us up to gain fat in the long run - Doctors discussing how a few minutes of a new form of exercise immunizes us against fat gain - Endocrinologists explaining how we fix the underlying condition causing us to gain fat We deserve to know the proven facts about fat loss, but who has time to read tens of thousands of pages of scientific studies? The study took me more than a decade. It should not take you that long because the facts have been summarized in this book. They have also been simplified, so anyone who wants to lose weight can understand them. Make no mistake. Tons of clinical studies have shown the best way to trim off those unwanted pounds.
