This book is based on the empirical work of a large-scale project to investigate the possible impacts of diversified forms of parental involvement on

children and school by first exploring through a series of ethnographic case studies how principals, teachers and parents perceive and act on parental involvement in the primary schools of Hong Kong and, then, examining how the different forms and levels of parental involvement are related to individual and institutional factors through a series of survey studies on all these stakeholders in children's education. Finally, the book assesses the extent to which different forms of parental involvement affect student performance based on student survey results and available school records.

In *Law and Community: The Case of Torts*, Robert F. Cochran Jr, and Robert M. Ackerman explore the connections between individualism and communitarianism in American Law. The authors argue that though tort law is dominated by individualistic language, it has significant communitarian influences.

How To Raise Your Children: How Do You Teach A Child Discipline? Independently Published

"In their introduction to this Handbook, the editors affirm: 'Many sociologists have come to realise that it makes no sense now to omit religion from the repertoire of social scientific explanations of social life'. I wholeheartedly agree. I also suggest that this wide-ranging set of essays should become a starting-point for such enquiries. Each chapter is clear, comprehensive and well-structured - making the Handbook a real asset for all those engaged in the field." - Grace Davie, University of Exeter "Serious social scientists who care about making sense of the world can no longer ignore the fact that religious beliefs and practices are an important part of this world... This Handbook is a valuable resource for specialists and amateurs alike. The editors have done an exceptionally fine job of incorporating topics that illuminate the range and diversity of religion and its continuing significance

throughout the world." - Robert Wuthnow, Princeton University At a time when religions are increasingly affecting, and affected by, life beyond the narrowly sacred sphere, religion everywhere seems to be caught up in change and conflict. In the midst of this contention and confusion, the sociology of religion provides a rich source of understanding and explanation. This Handbook presents an unprecedentedly comprehensive assessment of the field, both where it has been and where it is headed. Like its many distinguished contributors, its topics and their coverage are truly global in their reach. The Handbook's 35 chapters are organized into eight sections: basic theories and debates; methods of studying religion; social forms and experiences of religion; issues of power and control in religious organizations; religion and politics; individual religious behaviour in social context; religion, self-identity and the life-course; and case studies of China, Eastern Europe, Israel, Japan, and Mexico. Each chapter establishes benchmarks for the state of sociological thinking about religion in the 21st century and provides a rich bibliography for pursuing its subject further. Overall, the Handbook stretches the field conceptually, methodologically, comparatively, and historically. An indispensable source of guidance and insight for both students and scholars. The Science and Sense of Giving Your Kids More Control Over Their Lives AuthorHouse

Any parent who has raised more than one child is likely to be keenly aware of subtle or even striking differences among their offspring. The central premise of this volume is that children bring personal qualities to their relationships with other family members that help shape family interaction, relationships, and even processes that family researchers have called "parenting." The chapters address how children's personal qualities make their mark on families in ways that may in turn influence children's subsequent development. The volume is based on the presentations and discussions from a national symposium on "Children's influence on family dynamics: The neglected side of family relationships" held at the Pennsylvania State University, as the ninth in a series of annual interdisciplinary symposia focused on family issues. It is divided into four parts, each dealing with a different aspect of the topic. Part I sets the stage by focusing on the features of children that make a difference, as well as the kinds of research designs that are likely to shed light on the role of child influences. Part II focuses on early childhood, particularly the role of infant temperament and other individual differences in very young children in shaping their parents' behaviors, reactions in turn that feedback and influence the developing child. Part III focuses on adolescence, a time when young people are able to exert more choice in how they spend their time and who they spend it with. Part IV pulls the themes of the volume together and points the way for future research.

This is the first edited volume in the communication field to examine parent-child interaction. It creates a framework for future research in this growing area -- family communication, and more specifically, parent-child communication -- and also suggests new areas of communication research among parents and children -- cultural, work-related, taboo topics, family sex discussions, conflict, and abuse. Chapter authors provide thorough coverage of theoretical approaches, new methods, and emerging contexts including lesbian/gay parent-child relationships. In so doing, they bring a communication perspective to enduring problems of discipline, adolescent conflict, and physical child abuse. The text highlights various methodological approaches -- both quantitative and qualitative -- including conversation analysis, grounded theory, participant-observation, and phenomenological interviewing of children. It also introduces and surveys various theoretical approaches -- general systems, developmental, cultural, and intergenerational transmission.

Latinos in Israel charts the unexpected ways that non-citizen immigrants become potential citizens. In the late 1980s Latin Americans of Christian background started arriving in Israel as labor migrants. Alejandro Paz examines the ways they perceived themselves and were perceived as potential citizens during an unexpected campaign for citizenship in the mid-2000s. This ethnographic account describes the problem of citizenship as it unfolds through language and language use among these Latinos both at home and in public life, and considers the different ways by which Latinos were recognized as having some of the qualities of citizens. Paz explains how unauthorized labor migrants quickly gained certain limited rights, such as the right to attend public schools or the right to work. Ultimately engaging Israelis across many such contexts, Latinos, especially youth, gained recognition as citizens to Israeli public opinion and governing politics. Paz illustrates how language use and mediatized interaction are under-appreciated aspects of the politics of immigration, citizenship, and national belonging.

The Self-Driven Child Pitchstone Publishing (US&CA)

This Brief reviews the past, present, and future use of school corporal punishment in the United States, a practice that remains legal in 19 states as it is constitutionally permitted according to the U.S. Supreme Court. As a result of school corporal punishment, nearly 200,000 children are paddled in schools each year. Most Americans are unaware of this fact or the physical injuries sustained by countless school children who are hit with objects by school personnel in the name of discipline. Therefore, Corporal Punishment in U.S. Public Schools begins by summarizing the legal basis for school corporal punishment and trends in Americans' attitudes about it. It then presents trends in the use of school corporal punishment in the United States over time to establish its past and current prevalence. It then discusses what is known about the effects of school corporal punishment on children, though with so little research on this topic, much of the relevant literature is focused on parents' use of corporal punishment with their children. It also provides results from a policy analysis that examines the effect of state-level school corporal punishment bans on trends in juvenile crime. It concludes by discussing potential legal, policy, and advocacy avenues for abolition of school corporal punishment at the state and federal levels as well as summarizing how school corporal punishment is being used and what its potential implications are for thousands of individual students and for the society at large. As school corporal punishment becomes more and more regulated at the state level, Corporal Punishment in U.S. Public Schools serves an essential guide for policymakers and advocates across the country as well as for researchers, scientist-practitioners, and graduate students.

THE MARRIAGE & FAMILY EXPERIENCE: INTIMATE RELATIONSHIPS IN A CHANGING SOCIETY brings together all elements of the course -- including intimate relationships, family policy, and family issues. Striking a balance between an academic and more functional approach, the authors draw from research to present a sound sociological and family studies base enhanced by perspectives from anthropology, history, psychology, journalism, literature, economics, and gender studies. The book explores recent research on topics such as adoptive parenting, the transgender experience, childbearing patterns, gay and lesbian families, communication and conflict resolution, the influence of popular culture, and working families. Real-life examples and a focus on self-assessment and reflection make the book accessible and encourage students to think and act for themselves. The thirteenth edition retains a progressive approach to diversity yet remains rooted in a positive, pro-family perspective.
