"An engaging book... current and balanced treatment of all areas of child development."---Martha Arterberry, Colby College "The coverage of diversity and multicultural issues . . . is one of the strengths of the text and one of the most important reasons that I adopt it for my course on child development."---Kristy Burkholder, University of Wisconsin, Madison "This is a textbook that students actually like to read."---Shayla Holub, University of Texas, Dallas "Comprehensive but readable Strong connection between research/concepts and how they apply to children in the real world."---Megan McLelland, Oregon State University "The cultural diversity representations and references are one of the major strengths of this text. . . and one of the major reasons I would select it. The content provides the essential basics for what students need to know and presents the information in ways that are relevant, contemporary in application, and backed by solid research."---Karen Peterson, University of Washington, Vancouver "A very informative, high-quality, and classy text. It is exceedingly well researched."---Robert Hiltonsmith, Radford University "This text has the best coverage of diversity and multicultural issues of any text on the market."---Debbie Laible, Lehigh University "I love the pedagogy of this text---I wouldn't change it. I think the features . . . are very helpful in breaking up the text and supporting student learning."---Tom Power, Washington State University

The new edition retains the extensive cross-cultural and multicultural coverage, the innovative pedagogical learning system, and the balance between research and real-life applications that have made this text a favorite of students and professors alike. In the warmly-written and engaging style that is their hallmark, Papalia, Olds, and Feldman continue to provide a chronological view of lifespan development. The tenth edition expands

the coverage of cultural and historical influences on development, features the latest research, and introduces marginal callouts integrating the "LifeMap" Student CD-ROM with key concepts in the text.

Parents and teachers today face a swirl of conflicting theories about child rearing and educational practice. Indeed, current guides are contradictory, oversimplified, and at odds with current scientific knowledge. Now, in *Awakening Children's Minds*, Laura Berk cuts through the confusion of competing theories, offering a new way of thinking about the roles of parents and teachers and how they can make a difference in children's lives. This is the first book to bring to a general audience, in lucid prose richly laced with examples, truly state-of-the-art thinking about child rearing and early education. Berk's central message is that parents and teachers contribute profoundly to the development of competent, caring, well-adjusted children. In particular, she argues that adult-child communication in shared activities is the wellspring of psychological development. These dialogues enhance language skills, reasoning ability, problem-solving strategies, the capacity to bring action under the control of thought, and the child's cultural and moral values. Berk explains how children weave the voices of more expert cultural members into dialogues with themselves. When puzzling, difficult, or stressful circumstances arise, children call on this private speech to guide and control their thinking and behavior. In addition to providing clear roles for parents and teachers, Berk also offers concrete suggestions for creating and evaluating quality educational environments--at home, in child care, in preschool, and in primary school--and addresses the unique challenges of helping children with special needs. Parents, Berk writes, need a consistent way of thinking about their role in children's lives, one that can guide them in making effective child-rearing decisions. *Awakening Children's Minds* gives us the basic guidance we need to raise caring, thoughtful, intelligent children.

A best-selling, chronologically organized child development text, Berk and Meyers' *Infants and Children: Prenatal Through Middle Childhood* is relied on in classrooms worldwide for its clear, engaging writing style, exceptional multicultural and cross-cultural focus, rich examples, and long-standing commitment to presenting the most up-to-date scholarship while also offering students research-based, practical applications that they can relate to their personal and professional lives. The authors takes an integrated approach to presenting development in the physical, cognitive, emotional, and social domains; emphasize the complex interchanges between heredity and environment; and provide exceptional attention to culture. Renowned professor, researcher, and author Laura Berk is joined by new coauthor Adena Meyers. As faculty colleagues in the Department of Psychology at Illinois State University, they have collaborated on numerous projects, and their distinct areas of specialization and tremendous expertise make them a great team for coauthoring this new edition. Together, they present the latest theories and findings in the field to students in a manageable and relevant way. Berk and Meyers' signature story-like, conversational style invites

students to actively learn beside the text's "characters," who experience real issues in development, including physical, cognitive, and peer challenges, as well as parenting and educational concerns. Berk and Meyers also help students connect their learning to their personal and professional areas of interest, speaking directly about issues students will face in their future pursuits as parents, educators, health care providers, social workers, and researchers. As members of a global and diverse human community, students are called on to intelligently approach the responsibility of understanding and responding to the needs and concerns of children. While carefully considering the complexities of child development, the authors present classic and emerging theories in an especially clear, engaging writing style, with a multitude of research-based, real-world, cross-cultural, and multicultural examples. Strengthening the connections among developmental domains and of theory and research with applications, this edition's extensive revision brings forth the most recent scholarship, representing the changing field of child development. *Infants and Children: Prenatal Through Middle Childhood, Eighth Edition* is also available via REVEL(tm), an immersive learning experience designed for the way today's students read, think, and learn. Balanced coverage of the entire life span is just one thing that distinguishes *HUMAN DEVELOPMENT: A LIFE-SPAN VIEW, Seventh Edition*. With its comprehensive, succinct, and applied coverage, the text has proven its ability to capture students' interest while introducing them to the issues, forces, and outcomes that make us who we are. Robert V. Kail's expertise in childhood and adolescence, combined with John C. Cavanaugh's extensive research in gerontology, result in a book with a rich description of all life-span stages and important topics. A modified chronological approach traces development in sequential order from conception through late life, while also dedicating several chapters to key topical issues. This organization also allows the book to be relatively briefer than other texts, a benefit given the enormous amount of information covered in the course. The authors provide theoretical and empirical foundations that enable students to become educated, critical interpreters of developmental information. A blend of basic and applied research, as well as coverage of controversial topics and emergent trends, demonstrates connections between the laboratory and life. Laura Berk, renowned professor and researcher in the field of child development, has updated her successful chronological text with heightened attention to the relationship between theory, research, and applications. In her signature storytelling style, Berk presents a "cast of characters" based on real children and families for each unit, and actually uses these characters, by telling their "stories," to illustrate the sequence and processes of child development.
